

Web-Reports is an on-line result database provided exclusively for AntelBio customers. The site is available 24 hours a day – 7 days a week and results are uploaded as soon as testing is completed and results are verified. Customers receive an email notification when results become available.

Registration is required to utilize the site and information is password protected for security. Multiple users can be registered for a single customer account, but each must use a unique email address. Click on the following links to...

Results, as far back as June 2011 for many customers, are maintained on the site in a searchable and sortable format that can be viewed on screen and downloaded in .CSV (text) or .PDF formats. As new submissions are processed and uploaded to the site, information will continue to accumulate facilitating longer term analysis and management. Additional historical information, results prior to the implementation of Web-Reports can be made available on the site for a modest data handling fee, more information is available from AntelBio.

Interpretation of results is assisted by test-specific information which can be accessed by clicking on the [Supplemental Result Info](#) link once logged into Web-Reports. This information includes general background on conditions being tested for, results presentation, diagnostic performance and additional links. AntelBio strongly recommends that a qualified animal health professional be involved in management of the health and wellbeing of animals under test, including interpretation of results.
